# CHALKBOARD D(A)EMON

## Cure Brain Rot by Making Everyone Hate You!

**Lyra Phasma**

Kitty Demoness @ Heart

*@ Hack & Yap Ep. II — Zero-Ten Park, Makati*

*The Brilliantly Dumb Hackathon*

# “Just five more minutes.”

| | |
|---|---|
| **Water** | Warm |
| **Thumb** | Numb |
| **Stupid facts learned about an artist you don't even care about** | Embarrassing to even admit |

**The feed is infinite.**
**Your attention span is not.**

# Meet your New Personal Hell!

A background daemon lives in
your phone, laptop, PC

**Anywhere the algorithm has its claws in you**

After 20 minutes of doomscrolling,
it decides:

*You have sinned.*

# Why “Daemon”?

In computing, a daemon is a background process.

It quietly watches for the scroll spiral, then signals a tiny ESP32 device.

Phone. Laptop. PC.

**Everywhere you go to lose an hour.**

# Why “D(a)emon”?

Never a gentle reminder.

It calls upon the **seven circles of hell**

Multi-millennia fury of the undead
whose souls rest uneasy.

You have been sated by the mindless scroll.

**Now, you shall rest uneasy.**

# The Punishment Pipeline :3

| | |
|---|---|
| **SCROLL** | You lose 20 minutes to a social app. |
| **CONFESSION** | The daemon announces your name and your sins. |
| **DAMNATION** | An ESP32 unleashes the screams of the damned. |
| **REPENTANCE** | Put the phone down. Make it stop. |

*The threshold is configurable.*
*We are monsters, not unreasonable monsters.*

# Hardware from the Deepest Pit

- An **ESP32** and speaker to proclaim your sins
- A **servo** to drag a metal scribe across the...
- **metal plate** to produce an unbearable screech

A normal person would use a notification.

We chose **haunted classroom at 3 AM**.

# A *Totally* Normal Example

> LYRA! YOU HAVE SINNED ON TIKTOK FOR TWENTY MINUTES!

**SCREEEE

# The Seven Circles of Brain Rot

| | |
|---|---|
| **DENIAL** | “I’m just checking one thing.” |
| **DISTRACTION** | “Wait, what was I doing?” |
| **OBSESSION** | “One more video.” |
| **DISSOCIATION** | The thumb scrolls by itself. |
| **RAGE** | The device starts screaming. |
| **EMPTINESS** | The feed has ended. Somehow. |
| **YOU** | The final circle is your *For You* page. |

## Product: Horrible.
## Privacy: Need not be.

- Detect app usage locally where possible
- Let users choose which apps count
- Add quiet hours and a physical kill switch
- No cloud shame leaderboard by default

Goal is to interrupt the scroll,

**not to build a surveillance startup.**

# The Catch

It only stops when you stop.

Return to the mortal realm.

Or continue scrolling with the screams of the damned.

# MAY ALL YOUR SOULS BE DAMNED!

**...Lest one stops the doom of endless scrolls**
